Hospitality Lighting Application

This collection of images highlights hospitality applications of both designer David Trubridge and PLN Group's Hush Acoustic Lighting range. Both form and function are employed in full effect as these lighting lines simultaneously fulfill the project's lighting scope while enhancing the desired aesthetic qualities of each space.

David Trubridge

David Trubridge, the visionary New Zealand pendant lighting designer, fearlessly carves his own path, driven by his passion for originality, sustainable design, and relentless innovation. Inspired by nature's tapestry and the profound principles of biophilic design, his lighting creations evoke the essence of nature, infusing your space with a sense of wellness and tranquility through the captivating interplay of light and shadow.

HUSH Acoustic Lighting

Hush is an award-winning family of acoustic lights created by PLN Group in association with David Trubridge. The Hush line of lights has been engineered to absorb noise and reverberations to create a more peaceful working or living environment. The lightweight, semi-rigid acoustic panels help mitigate the impact of noise in any space they're installed.
